¹This column indicates the regulations applicable to the Neighborhood Conservation (NC) District, which has different standards according to the minimum lot size of the particular district. The minimum lot size of a Neighborhood Conservation (NC) District varies and is a function of the character of that district as of the date of enactment of this Ordinance. The subscript following the "NC" in each row of this tables designates the minimum lot size in thousands of square feet (as the district is designated on the official zoning map). Thus, the minimum lot area in a district designated NC-80 is 80,000 square feet.

²For lots fronting on a curve, see the City of Auburn Subdivision Regulations, Article IV, Section (E)(2).

Width at road frontage shall be measured along a straight line connecting the foremost points of the side lot lines.

³Maximum impervious surface ratio.

See Section 517 for minimum standards for flag lots
